

James L. Holly, M.D.

The Acorn and the Oak

The acorn produces the oak; written out, the information contained in the acorn fills a library. The information needed to provide excellent healthcare fills multiple libraries. To bring that knowledge to bear on your health needs, SETMA has an "acorn" in every examination room. We call it a computer.

The knowledge and information required to secure your future health is beyond anyone's capacity to memorize, or physically to carry from place to place. Therefore, in every examination room, in every emergency room, on every floor of every hospital and in every providers' home and soon in every nursing home, SETMA has an "acorn" -- a computer -- which places at the provider's fingertips the data needed to guide your healthcare decisions.

With disease management tools for hypertension, congestive heart failure, headaches, diabetes, weight management, metabolic syndrome, cholesterol, exercise, asthma, hydration, kidney disease, diabetic education, depression, heart disease and many more, and with health and wellness algorithms, SETMA can bring the "acorn's capacity" to bear upon every visit.

SETMA's multi-specialty, multi-sited, multi-faceted diagnostic clinic -- SETMA's healthcare oak -- is a unique Southeast Texas healthcare resource. Come see what the future of healthcare looks like today. Come see what your health can be tomorrow. Come to SETMA: Healthcare Where Your Health Is The Only Care
