

James L. Holly, M.D.

Medical Home News Dr. Ronald Palang Response to Dr. Holly's Critique of Alex Tolbert's Top Three Obstacles to Better Primary Care

Very nice article Dr. Holly. Growing up poor in the Philippines where "free market" dictates the level of healthcare an individual gets, I saw two of my younger brothers and my sister died of just very simple childhood illnesses. I realized that the little money I spend for a dinner out with my family today could likely save their lives at that time. Healthcare is not just economics, it is ethics as well. Regards, Ron
