Subject: Re: SEMTA's Philosophy of Quality Metrics -- Their Limitations and the IOM Report Measuring Vital Signs

Larry- once again I am astounded by how much I agree with you. I have been pondering this same "new blumenthal pronouncement". You nailed my concerns and then also delved very deeply from the well of your real life practice experience.

I want to have a phone conversation w you about our project to "transform healthcare by creating healthy communities".

May I get my scheduling person to get us a call scheduled?

Camille D. Miller

President/CEO

Texas Health Institute
