Hi Dr. Holly

I have had the good fortune to speak with a couple of fellow citizens who are national treasures. Meeting you - another member of this most exclusive club - was inspirational.

You boosted my regard for doctors.

You boosted my regard for the people of the South.

You boosted my regard for humanity.

Please don't push yourself too hard - the country desperately needs healers of your caliber.

With best personal regards,

Chris

PS: I plan to write my Revenue Cycle Exchange story this afternoon and will send the portion of the piece that has your quotes ASAP.

It is as I suspected, Dr. Holly: You and SETMA are ahead of the value-based payment model curve. Is there any area of healthcare reform you have left unexplored?! You are an impressive reformist figure, with unique depth of experience. Eager to talk next week,

Chris

You are a dynamo! I'm beginning to see why your son wants you to slow down. We have a lot to talk about 8-) Have a great weekend, Chris
