

James L. Holly, M.D.

Patient-Centered Medical Home and Care Transitions Part II

By James L. Holly, MD

Your Life Your Health

The Examiner

April 28, 2011

The complexity of the **Transition of Care** is illustrated by this analysis of how many different places this document can be needed. It can go from:

1. **Inpatient to ambulatory outpatient** (family) -- The "baton" in a printed format is given to the patient or in the case of a minor or incompetent adult to a parent or care giver. The "plan of care and treatment plan" -- "the baton" -- is reviewed with the patient, parent and/or family before the patient leaves the hospital.
2. **Inpatient to ambulatory outpatient** (clinic physician) -- for patients who are seen at SETMA, the "the baton" is created in the EHR and is immediately accessible to the follow-up SETMA provider. The provider is alerted by appointment when he/she is to see the patient and that the "baton" is available for review.
3. **Inpatient to ambulatory outpatient** (follow-up call) -- after the Hospital Care Summary and Post Hospital Plan of Care and Treatment Plan (HCSHPCTP) is completed, a template is completed and sent to the Department of Care Coordination. This template is in the EHR where the HCSHPCTP also resides. Both are immediately accessible to the Department. The "follow-up call from the hospital" call request is delayed for one day so that the call is made the day after the patient leaves the hospital.
4. **Emergency Department to ambulatory care** -- the same process as in "1" above.
5. **Inpatient to Nursing Home** -- the "baton" with a special set of Nursing Home orders is given to the patient or family and a copy is sent to the Nursing Home with the transportation to the Nursing home.
6. **Inpatient to Hospice** -- the same as with number "6"
7. **Inpatient to Home Health** -- the same as number "5" and "6" above. If the patient is seeing SETMA's home health, they have access to SETMA EHR and thus to the "baton."
8. **Inpatient to outpatient out of area** -- "Baton" given to patient and family and also posted to web portal and HIE. Token sent to health provider in remote area which allows one time access to this patient's information.

With this infrastructure and with these care coordination, continuity of care and patient support functions, SETMA is ready to make a major effort to decrease preventable readmissions to the hospital.

The document generated once the care transition issues are met, in part looks like the following. The full document includes reconciled medications, follow-up appointments with time, dates, address and provider name and any referrals which have been initiated as a result of the hospitalization.

The Baton

“The Baton” is a portrayal of the “plan of care and treatment plan” which is like the “baton” in a relay race. It is the instrument through which responsibility for a patient’s health care is transferred to the patient or family. Framed copies of this picture hang in the public areas of all SETMA clinics and a poster of it hangs in every examination room. The poster declares:

Firmly in the providers hand
--The baton – the care and treatment plan
Must be confidently and securely grasped by the patient,
If change is to make a difference
8,760 hours a year.

The poster illustrates:

1. That the healthcare-team relationship, which exists between the patient and the healthcare provider, is key to the success of the outcome of quality healthcare.
2. That the plan of care and treatment plan, the “baton,” is the engine through which the knowledge and power of the healthcare team is transmitted and sustained.
3. That the means of transfer of the “baton” which has been developed by the healthcare team is a coordinated effort between the provider and the patient.
4. That typically the healthcare provider knows and understands the patient’s healthcare plan of care and the treatment plan, but that without its transfer to the patient, the provider’s knowledge is useless to the patient.
5. That the imperative for the plan – the “baton” – is that it be transferred from the provider to the patient, if change in the life of the patient is going to make a difference in the patient’s health.
6. That this transfer requires that the patient “grasps” the “baton,” i.e., that the patient accepts, receives, understands and comprehends the plan, and that the patient is equipped and empowered to carry out the plan successfully.
7. That the patient knows that of the 8,760 hours in the year, he/she will be responsible for “carrying the baton,” longer and better than any other member of the healthcare team.

The genius and the promise of the Patient-Centered Medical Home are symbolized by the “baton.” Its display continually reminds the provider and will inform the patient, that to be successful, the patient’s care must be **coordinated**, and must result in **coordinated care**. In 2011, as we expand the scope of SETMA’s Department of Care Coordination, we know that coordination begins at the points of “transitions of care,” and that the work of the healthcare team – patient and provider – is that together they evaluate, define and execute that plan.

Hospital Follow-up Call

After the care transition audit is completed and the document is generated, the provider completes the **Hospital-Follow-up-Call** document:

Hospital Discharge Follow-Up Call

Return

Number to Call

 Home Phone (409)892-0021
 Day Phone () -
 Other () -

Send Delayed-Delivery Email to Follow-Up Nurse

Admit Date: 04/09/2011
 Discharge Date: 04/11/2011

Setting: ER
 In Patient

Hospice: Texas Home Health
 Home Health: _____

Discharge Diagnoses

Abd Pain Generalized
COPD
Drug Depend Opioid Oth Epis
Tobaccoism -- Use Disorder
Hypotension Chronic
Anemia Unspecified

Diet: Regular
 Exercise: _____

Call Attempts

Questions to Ask

General

How are you feeling?
 Are you having new symptoms since hospital stay?
 Have you obtained all DME that you were prescribed?
 Other: You have been scheduled to see a SETMA provider (Dr. He

Medications

Were you able to get all of your medications filled?
 Are you taking all of your prescribed medications?
 Are you having any problems/side effects from your medications?

Appointments

Have you kept or are you aware of your appointment(s) with...?

Dumitru	Adrian	on	//
		on	//
		on	//

Patient Responses

How does the patient feel?
 Is the patient having new symptoms?

Is the patient taking all of their medications?
 Is the patient having any problems/side effects?

Has the patient kept and/or aware of all scheduled appointments or referrals?

Additional Comments

Click to Document Completion Follow-Up Call Completed By

Click to Send Response At //

Spoke with the patient? Yes No

If no, list person spoken with: _____

Actions Taken

Advised Patient To Come In - Made Same-Day Appointment
 Advised Patient To Call If Improvement Discontinues
 Advised Patient To Continue Medications

Other: _____

New Referrals from Visit (This Visit Only)

Status	Priority	Referral	Referring Provider
Completed	Immediate	Abdominal U/S	

New/Changed Medications from Visit (This Visit Only)

Generic Name	Brand Name	Dose
ALPRAZOLAM	XANAX	1 mg
ALPRAZOLAM	XANAX	1 mg
BISACODYL	DULCOLAX	10 mg
BUSPIRONE HCL	BUSPAR	10 mg

During that preparation, the provider checks off the questions which are to be asked the patient in the follow-up call. The call order is sent to the Care Coordination Department electronically. The day following discharge, the patient is called. This call is a beginning of the “coaching” of the patient to help make them successful in the transition from the inpatient setting to their next level of care. After the call is completed, the answers to the questions are sent back to the primary care provider by the care coordinator. If the patient has any unresolved issues or is having any problem, he/she is given an appointment that same day.

The Care Coordination takes 12-30 minutes with each patient and engages the patient in eliminating barriers to care. If appropriate, an additional call is scheduled at an appropriate interval. If after three attempts, the patient is not reached by phone, the box in the lower left-hand corner by “**Unable to Call, Letter sent**” is checked. Automatically, a letter is created which is sent to the patient asking them to contact SETMA.

Follow-up Visit with Primary Care Provider

The Transition of Care is complete only when the patient is seen by the primary care provider in follow-up. Many issues are dealt with in this follow-up visit, but one of them is another potential referral to the Care Coordination Department. If the patient has any barriers to care, the provider will complete the following template. In the case of this patient, with the checking of three buttons the need for financial assistance with medications and with transportation is communicated to the Care Coordination Department by clicking the button in red entitled, "Click to Send to Care Coordination Team."

The SETMA Foundation and Patient-Centered Medical Home

Four years ago the partners of SETMA formed **The SETMA Foundation**. This Foundation provides funding for health care for our patients who cannot afford it. In the past 16 months, the partners of SETMA have contributed \$1,000,000 to the Foundation and the results in the lives of our patients have been miraculous. The following is an illustration of the union of Care Transitions, Care Coordination, The Foundation and PC-MH.

Under the Medical Home model the provider has NOT done his/her job when he/she simply prescribes the care which meets national standards. Doing the job of Medical Home requires the prescribing of the best care which is available and accessible to the patient, and when that care is less than the best, the provider makes every attempt to find resources to help that patient obtain

the care needed. In February 2009, SETMA saw a patient who has a very complex and fascinating healthcare situation. When seen in the hospital as a new patient, he was angry, bitter and hostile. No amount of cajoling would change the patient's demeanor. During his office-based, hospital follow-up, it was discovered that the patient was only taking four of nine medications because of expense; could not afford gas to come to the doctor; was going blind but did not have the money to see an eye specialist; could not afford the co-pays for diabetes education and could not work but did not know how to apply for disability.

After his office visit, he left SETMA with our Foundation providing:

1. All of his medications. The Foundation has continued to do so for the past two years at a cost of \$2,200 a quarter. In September, his Medicare benefits will begin after two years of being disabled.
2. A gas card so that he could afford to come to multiple visits for education and other health needs.
3. Waiver of cost for diabetes education with SETMA's American Diabetes Association accredited Diabetes Self Education and Medical Nutrition Therapy program.
4. Appointment to an experimental vision preservation program at no cost.
5. Assistance with applying for disability.

Are gas cards, disability applications, paying for medications a part of a physician's responsibilities? Absolutely not; but, are they a part of Medical Home? Absolutely! This patient, who was depressed and glum in the hospital, such that no one wanted to go into the patient's room, left the office with help. He returned six-weeks later. He had a smile and he had hope. It may be that the biggest result of Medical Home is hope. And, his diabetes was treated to goal for the first time in ten years. He has remained treated to goal for the past two years. Every healthcare provider doesn't have a foundation and even ours can't meet everyone's needs, but assisting patients in finding the resources is a part of medical home. And, when those resources cannot be found, Medical Home will be "done" by modifying the treatment plan so that what is prescribed can be obtained. **The ordering of tests, treatments, prescriptions which we know our patients cannot obtain is not healthcare, even if the plan of care is up to national standards.**

Care Transition is the heart of the patient-centered medical Home. It fulfills many of the elements of the National Priorities Partnership in which the National Quality Forum identified Priorities for the 2011 National Quality Strategy. These are:

- Wellness and Prevention
- Safety
- Patient and Family Engagement
- Care Coordination
- Palliative and End of Life Care

These are SETMA's goals. We shall see how well we do.
