Southeast Texas Medical Associates, LLP

To meet expectations for improved outcomes, increased value and more accountable, sustainable health systems, healthcare organizations are working to...

**IMPROVE
OPERATIONAL
EFFECTIVENESS**

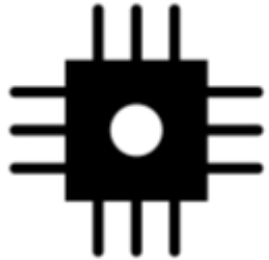

**DELIVER
COLLABORATIVE
CARE FOR
PREVENTION AND
WELLNESS**

**ACHIEVE BETTER
QUALITY
AND OUTCOMES**

Smarter Healthcare is using information in new ways

INSTRUMENTED

New Data

INTERCONNECTED

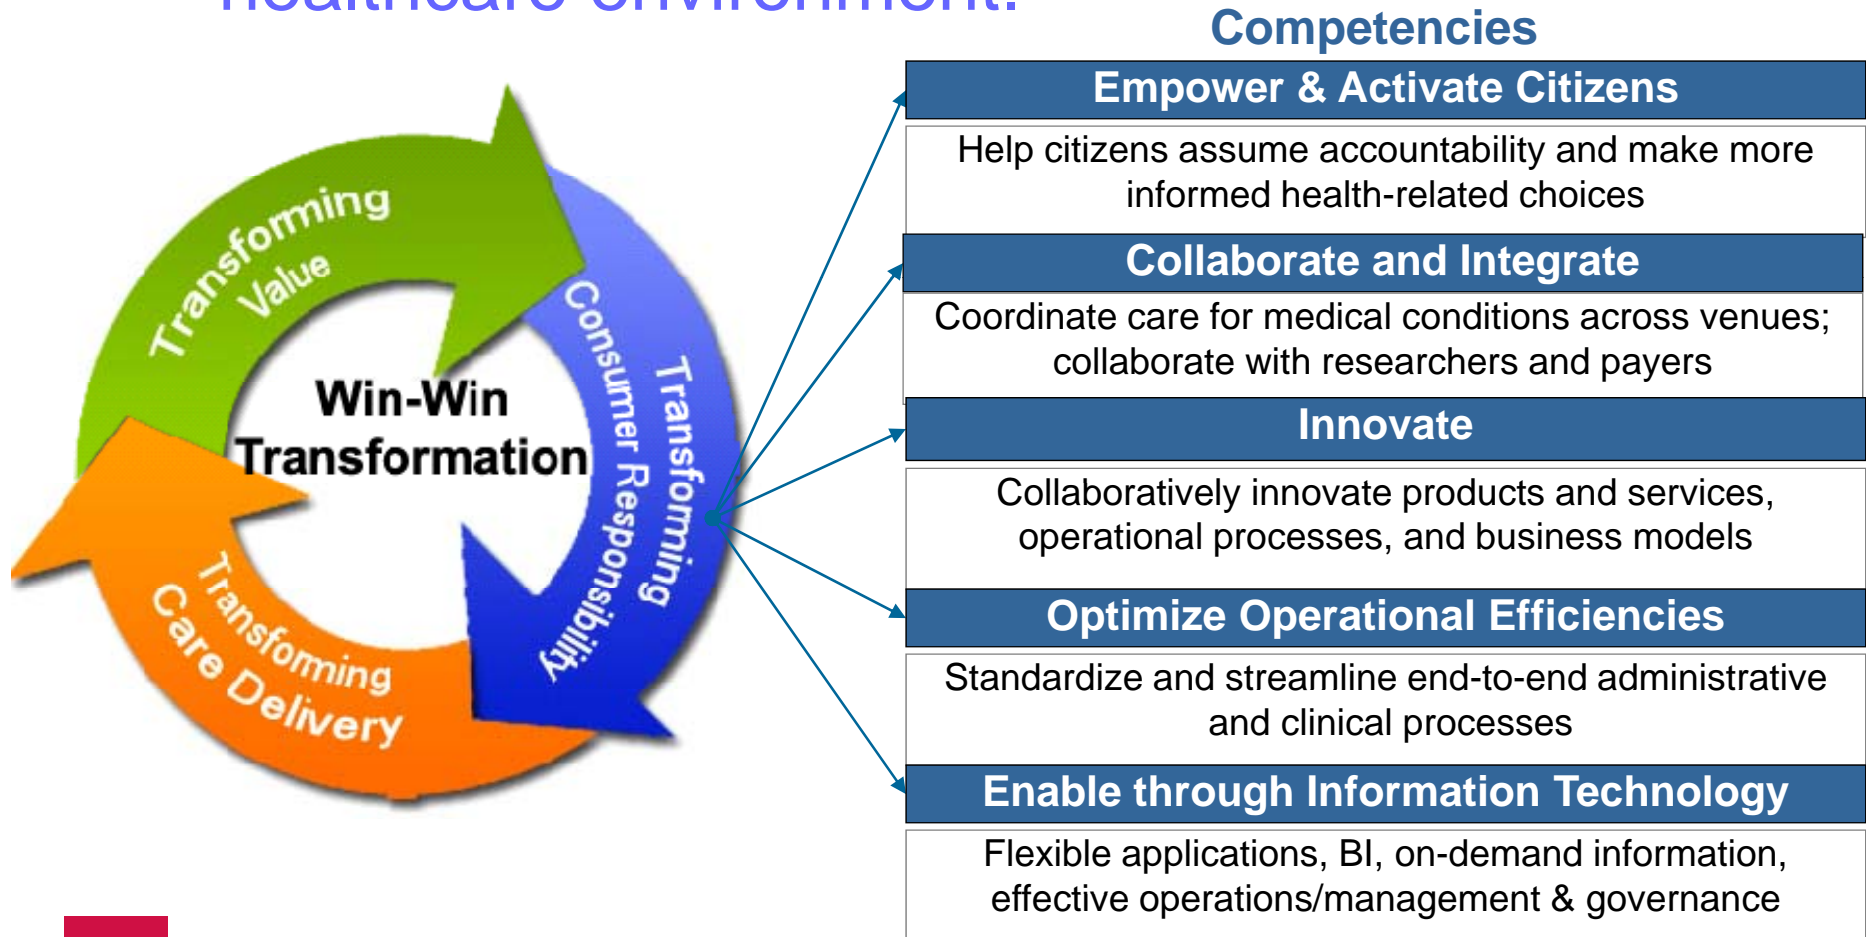

**New Insights
& Visibility**

INTELLIGENT

**New &
Optimized
Processes**

Healthcare organizations will need to emphasize different competencies to thrive in the changing healthcare environment.

Industry Crisis: Driving BI & Performance Management in Healthcare

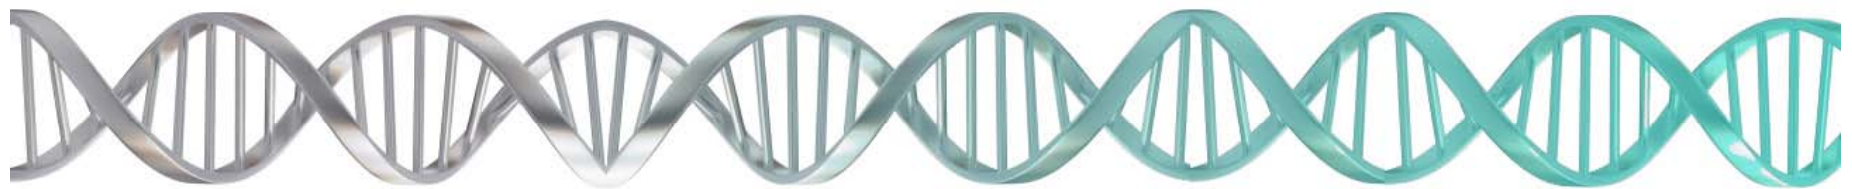

Cost Reduction: Identifying, implementing, and monitoring operational process efficiencies to drive reduction in operating costs

Care Quality: Optimizing and aligning clinical processes to improve quality, patient safety, and clinical outcomes

Access and Transparency: Providing cost and quality information to purchasers, consumers, and regulators to drive accountability, collaboration, and equitable access to care

Sustainability and Profitable Growth: Supporting the organizational mission by ensuring market competitiveness, leveraging capacity and capabilities to expand into new markets, partnerships, products, and services

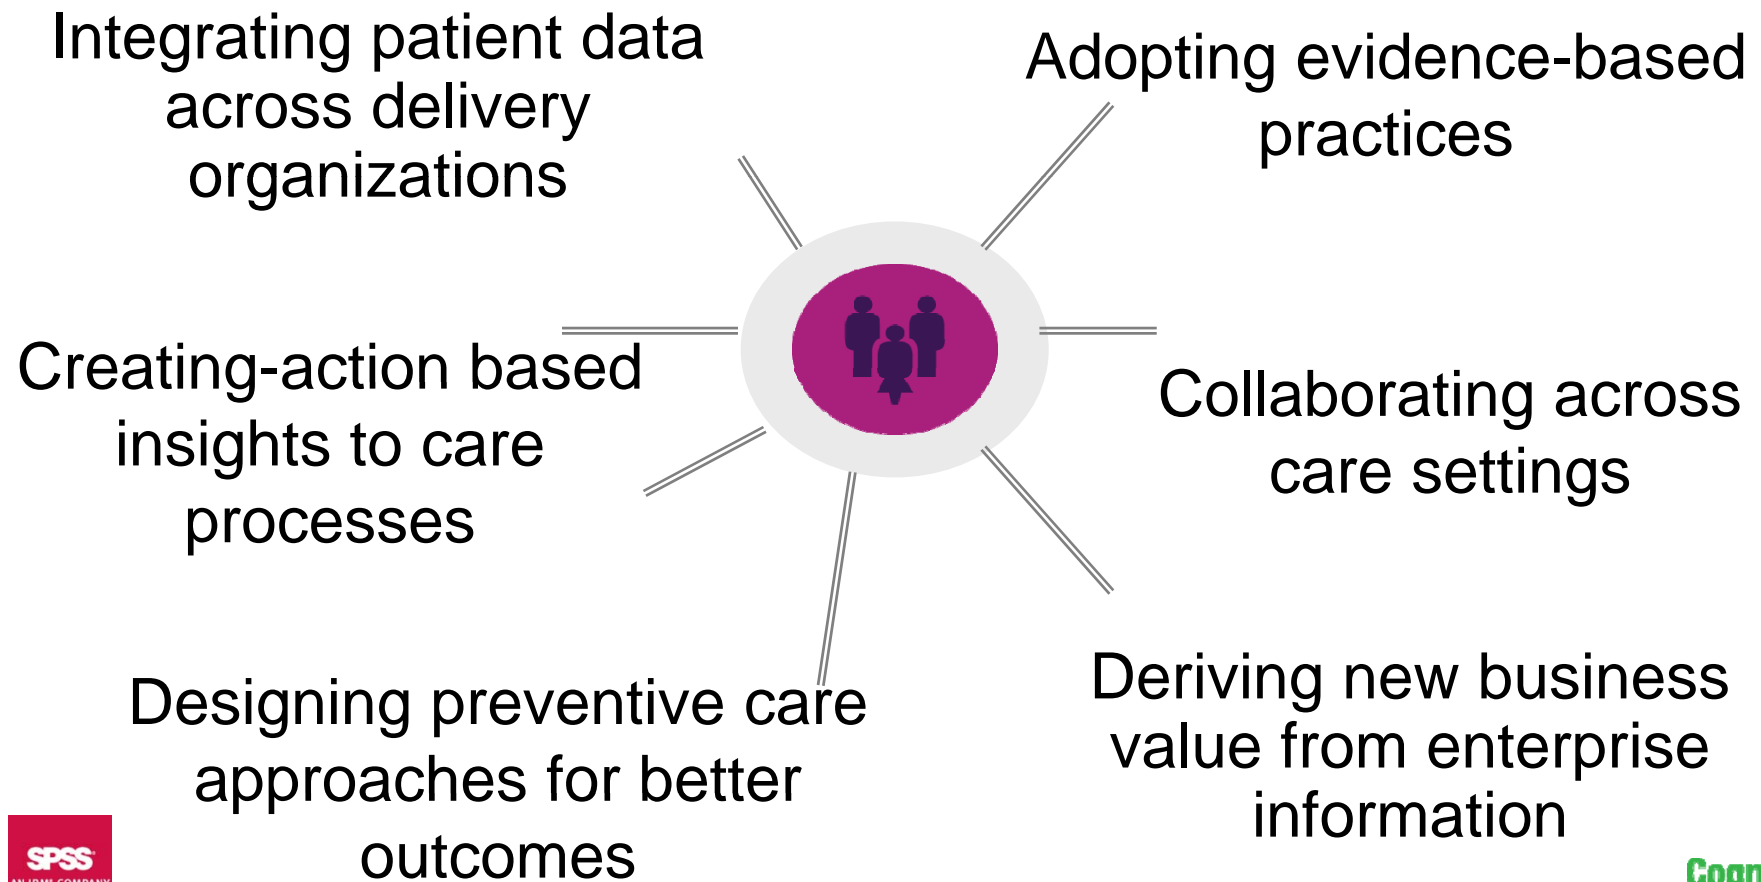

Data and analytics are key enablers for healthcare objectives

Transformation

Moving towards evidence-based, personalized medicine for lifetime health maintenance and disease prevention

Care Quality: Critical initiatives lead to change and innovation

Business intelligence enables actionable insights-- --Incremental improvements lead to lasting value

Metrics turn raw data into measured results

Measure

Results are analyzed to produce insights and new information

Analyze

Change is driven back into the organization...

Optimize

Producing value and opportunity for continuous, iterative improvement

About SETMA

Southeast Texas Medical Associates, LLP (SETMA) was founded August 1, 1995.

SETMA currently has 29 healthcare providers in the following specialties:

- Internal Medicine
- Family Practice
- Pediatrics
- Nurse Practitioners
- Cardiology
- Neurology
- Infectious Disease
- Ophthalmology

SETMA's Landmarks

- March 1998 – Acquired Electronic Health Records (EHR)
- January 1999 – All patients seen using EMR
- May 1999 – Began thinking in terms of “Electronic Patient *Management*” (EPM), rather than EHR
- October 2009 – Began “COGNOS Project”
- June 2010 – NCQA Tier 3 Patient-Centered Medical Home (PCMH)
- August 2010 – Affiliate of Joslin Diabetes Center, an Affiliate of Harvard Medical School
- August 2010 – NCQA Diabetes Recognition
- September 2010 – AAAHC Ambulatory Care/Medical Home Accreditation

Systems Thinking and Health

“Systems-thinking” (Senge, *The Fifth Discipline*) and the data display designed on those principles allow the provider to “see” the patient as a whole: as a “granular portrait”, rather than as a faceless “silhouette.”

Data Display

Data display can obscure effective management, if it simply presents more detail while ignoring or obscuring the dynamic interaction of one part of a biological system with another.

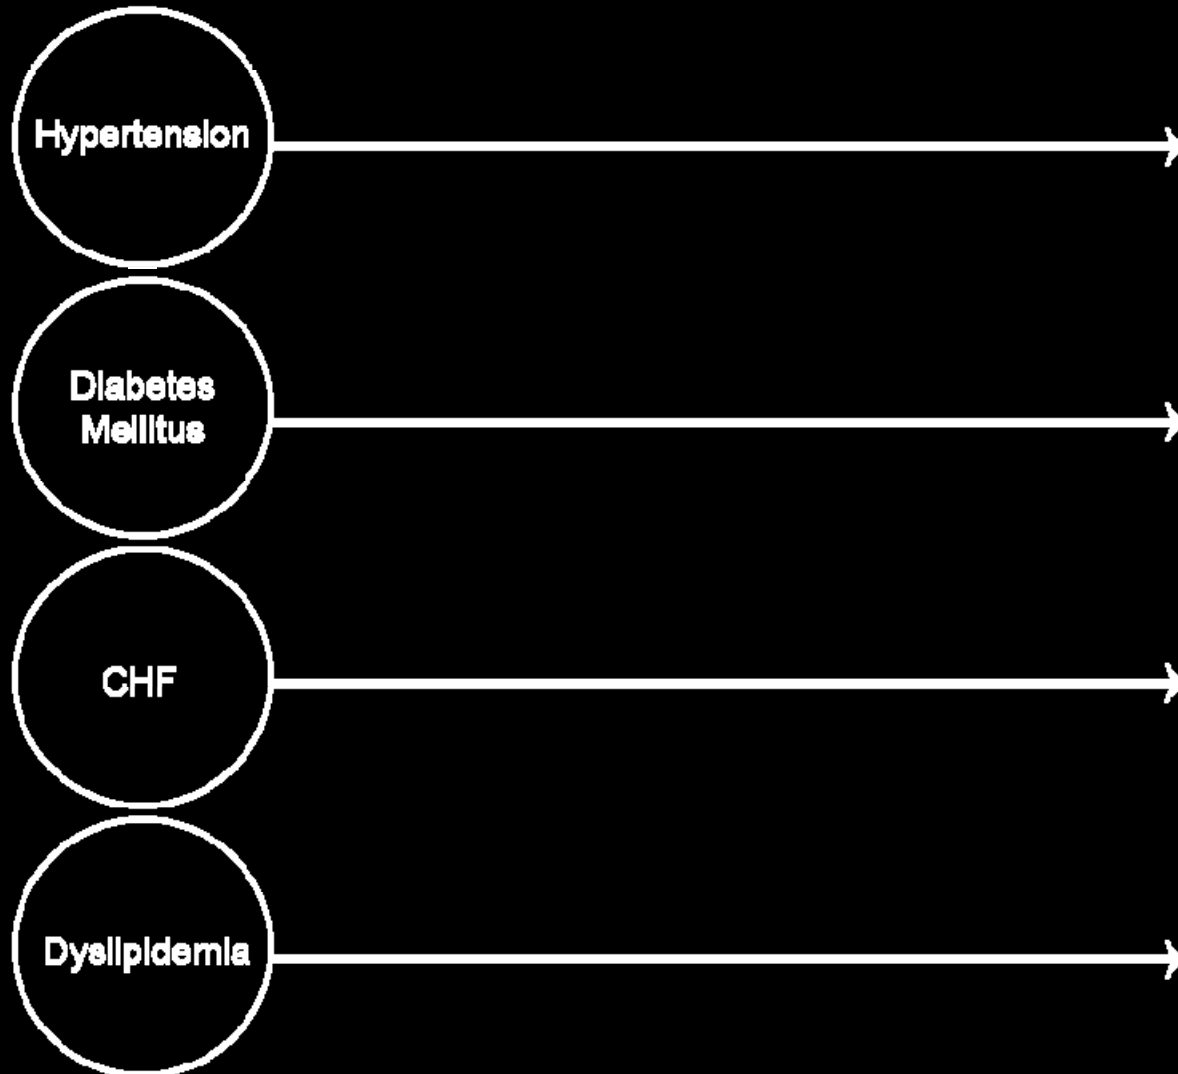

Seeing Circles of Causality

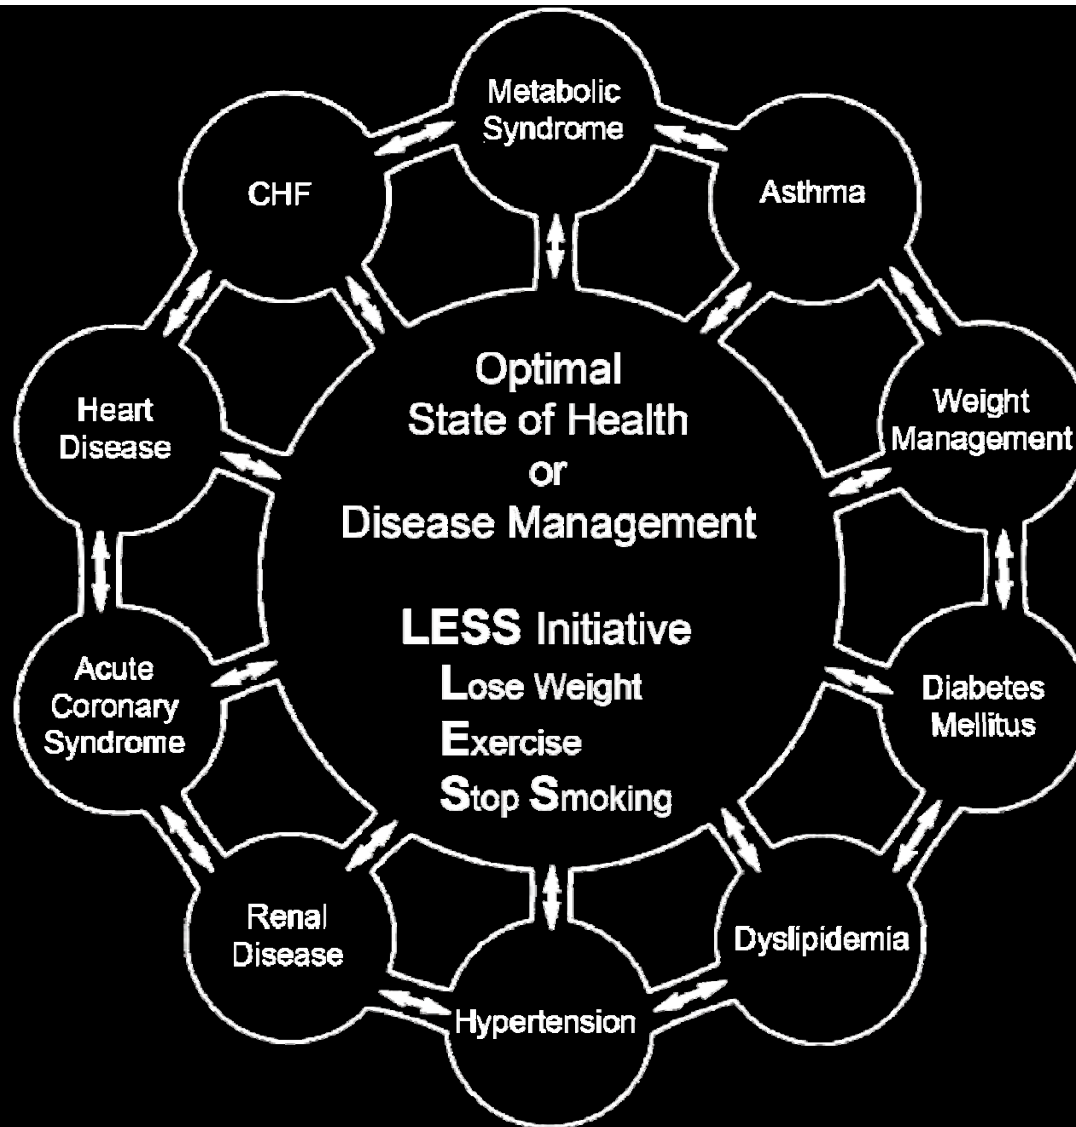

“Reality is made up of circles, but we see straight lines...Western languages...are biased toward a linear view. If we want to see system-wide interrelationships...we need a language of interrelationships, a language of circles.”

(The Fifth Disciple, Dr. Peter Senge)

Linear Thinking

Circular Causality

SETMA's Model of Care

1. Performance Tracking – one patient at a time
2. Performance Auditing – by panel or population
3. Analysis of Provider Performance Data
4. Public Reporting by Provider Name
5. Quality Assessment/Performance Improvement

Tracking Performance At The Point of Care

SEMA tracks multiple Physician Consortium for Performance Improvement (PCPI) measurement sets:

- Chronic Stable Angina
- Congestive Heart Failure
- Diabetes
- Hypertension
- Chronic Renal Disease
- Weight Management
- Care Transitions

Tracking Performance At The Point of Care

SETMA also tracks the following published quality performance measure sets:

- HEDIS
- NQF
- AQA
- PQRI
- BTE

Each is available to the provider, interactively at each patient encounter.

**National Quality Forum (NQF)
National Voluntary Consensus Standards**

Legend Measures in red are measures which apply to this patient that are not in compliance.
Measures in black are measures which apply to this patient that are in compliance.
Measures in gray are measures which do not apply to this patient.

General Health Measures	Care for Older Adults
View Body Mass Index Measurement	View Counseling on Physical Activity
View Smoking Cessation	View Urinary Incontinence in Older Adults
View Proper Assessment for Chronic COPD	View Colorectal Cancer Screening
View Adult Immunization Status	View Fall Risk Management
Blood Pressure Measures	Diabetes Measures
View Blood Pressure Measurement	View Dilated Eye Exam
View Blood Pressure Classification/Control	View Foot Exam
Medication Measures	View Hemoglobin A1c Testing/Control
View Current Medication List	View Blood Pressure
View Documentation of Allergies/Reactions	View Urine Protein Screening
View Therapeutic Monitoring of Long Term Medications	View Lipid Screening
View Drugs to Avoid in the Elderly	Female Specific Measures
View Appropriate Medications for Asthma	View Breast Cancer Screening
View Inappropriate Antibiotic Treatment for Adults with Acute Bronchitis	View Cervical Cancer Screening
View LDL Drug Therapy for Patients with CAD	View Chlamydia Screening
View Warfarin Therapy for Atrial Fibrillation	View Osteoporosis Management
	Pediatric Measures
	View Appropriate Screening for Children with Pharyngitis
	View Childhood Immunization Status

Tracking Performance At The Point of Care

This tool allows the provider to assess comprehensive quality measures for “screening” and “prevention” of each patient.

Audit Previsit [X]

Pre-Visit/Preventive Screening

General Measures (Patients >18)

Has the patient had a tetanus vaccine within the last 10 years?

Date of Last

Has the patient had a flu vaccine within the last year?

Date of Last

Has the patient ever had a pneumonia shot?

Date of Last

Does the patient have an elevated (>100 mg/dL) LDL?

Last

Elderly Patients (Patients >65)

Has the patient had an occult blood test within the last year? (Patients >50)

Date of Last

Has the patient had a fall risk assessment completed within the last year?

Date of Last

Has the patient had a functional assessment within the last year?

Date of Last

Has the patient had a pain screening within the last year?

Date of Last

Has the patient had a glaucoma screen (dilated exam) within the last year?

Date of Last

Does the patient have advanced directives on file or have they been discussed with the patient?

Discussed? Yes No Completed? Yes No

Is the patient on one or more medications which are considered high risk in the elderly?

Diabetic Patients

Has the patient had a HgbA1c within the last year?

Date of Last

Has the patient had a dilated eye exam within the last year?

Date of Last

Has the patient had a 10-gram monofilament exam within the last year?

Date of Last

Has the patient had screening for nephropathy within the last year?

Date of Last

Female Patients

Has the patient had a pap smear within the last two years? (Ages 21 to 64)

Date of Last

Has the patient had a mammogram within the last two years? (Ages 40 to 69)

Date of Last

Has the patient had a bone density within the last two years? (Age >50)

Date of Last

Male Patients

Has the patient had a PSA within the last year? (Age >40)

Date of Last

Has the patient had a bone density within the last two years? (Age >65)

Date of Last

Tracking Performance At The Point of Care

PQRI

PQRI Submittal Summary

Diabetes Measures Group

This patient **IS** eligible for submittal of the measures in the diabetes group.

Patients 18 to 79 with Diabetes Mellitus are eligible for this measure.

Hemoglobin A1c Target < 9.0

Blood Pressure
Systolic Target < 140

Diastolic Target < 80

Foot Exam

Lipids Target < 100

Nephropathy

Eye Exam

Preventive Measures Group

This patient **IS** eligible for submittal of the measures in the preventive group.

Patients ages 50 and older are eligible for this measure.

Tobacco Use Assessment

Tobacco Cessation Assessment

Body Mass Index

Influenza Immunization

Colorectal Cancer Screening

Pneumococcal Vaccination

Mammography Screening

Urinary Incontinence Assessment

Clusters and Galaxies

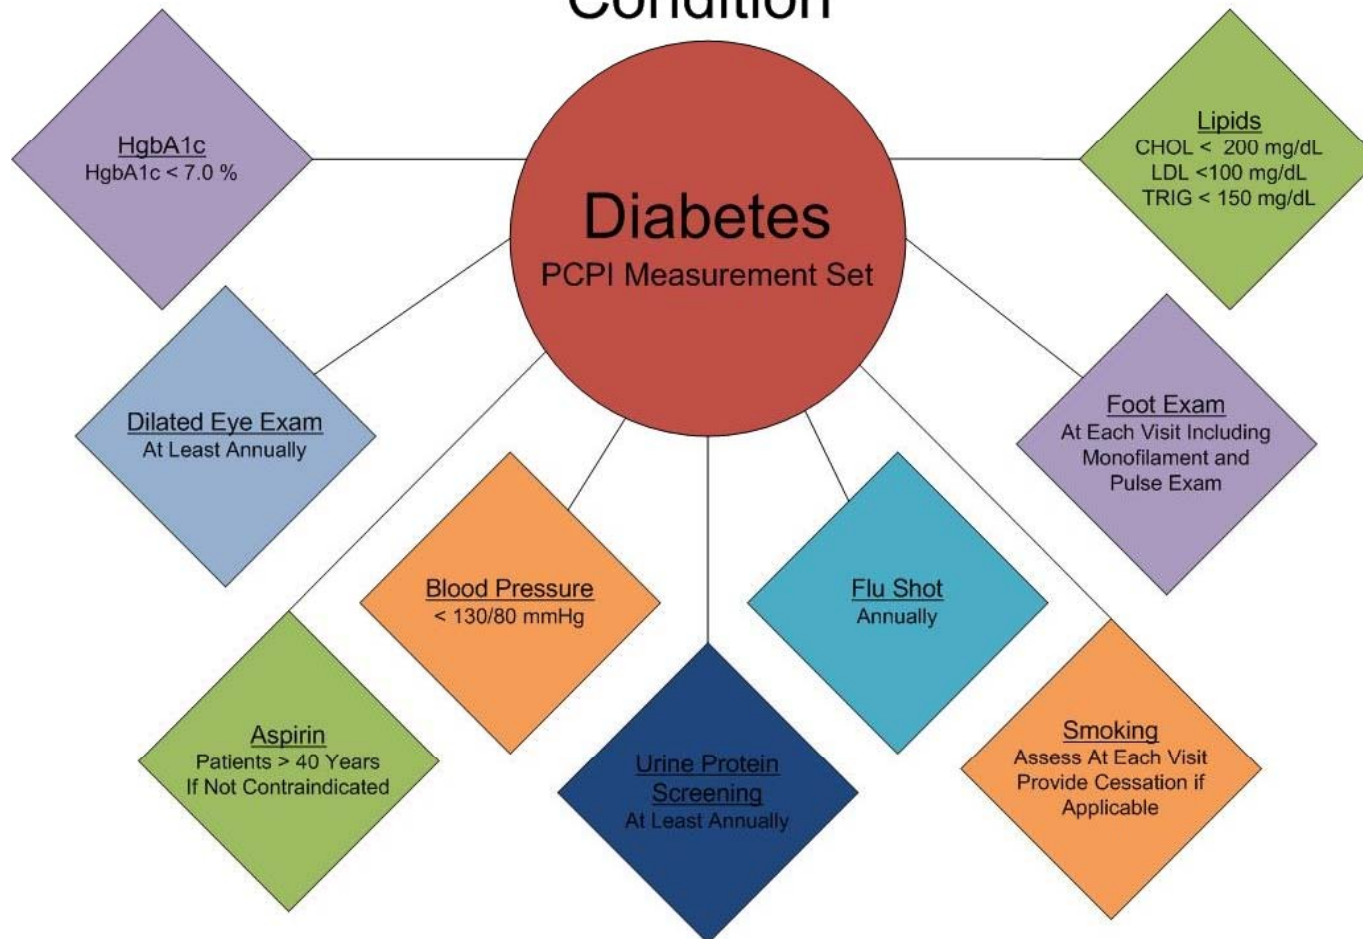

- A “*cluster*” is seven or more quality metrics for a single condition, i.e., diabetes, hypertension, etc.
- A “*galaxy*” is multiple clusters for the same patient, i.e., diabetes, hypertension, lipids, CHF, etc.
- Fulfilling a single or a few quality metrics does not change outcomes, but fulfilling “clusters” and “galaxies” of metrics at the point-of-care can and *will* change outcomes.

Auditing Performance After the Visit

A “Cluster” -- Multiple Metrics on a Single Condition

Auditing Performance After the Visit

A "Galaxy" -- Multiple "Clusters" Tracked on a Single Patient at a Single Visit

Auditing Performance After the Visit

Unlike a single metric, such as “was the blood pressure taken,” which will not improve care

However, fulfilling and then auditing a “cluster” or a “galaxy of clusters” in the care of a patient **will** improve treatment outcomes and **will** result in quality care.

Auditing Performance After the Visit

What is most often missing in quality improvement initiatives is real-time, auditing with comparative display of results, and public reporting.

The screenshot shows the SEMA website interface. At the top left is the SEMA logo. The main header reads "Healthcare Where Your Health is the C". Below the header is a navigation bar with the following items: "About Us", "Letters", "In The News", "Providers", and "Your Life You". A secondary navigation bar includes "Electronic Patient Management Tools", "Public Reporting", and "Medical Home". The "Public Reporting" menu is expanded, listing the following items with right-pointing chevrons: PQRI, NQF, HEDIS, NCQA, PCPI, SETMA Lipid Audit, AQA, COGNOS Project, SETMA Audit for CKD Stages I III, and Patient Satisfaction Survey. The main content area on the left contains a link titled "Healthcare improvement will re:" and a paragraph starting with "SouthEast Texas Medical Asso" which discusses secure records and historical data. Another paragraph mentions "SETMA also operates a clinical lab" and "SETMA is continually developing n". A third paragraph states "SETMA's growing provider base in" and includes links for "Practitioners" and "Family Practice". The text concludes with "of Excellence continues to grow at". At the bottom, it says "SETMA continues to expand its se".

Auditing Performance After the Visit

SETMA deployed IBM Cognos Business Intelligence software, to audit provider performance and compliance.

SETMA's *COGNOS Project* allows all providers to:

1. Display their performance for their entire patient base
2. Compare their performance to all practice providers
3. See outcome trends to identify areas for improvement
4. Do this at the point-of-care

Auditing Performance After the Visit

- SETMA contracted with LPA Systems (www.lpa.com) to build our auditing tools.
- LPA designed a data warehouse to minimize the impact on our production servers.

Analyzing Provider Performance

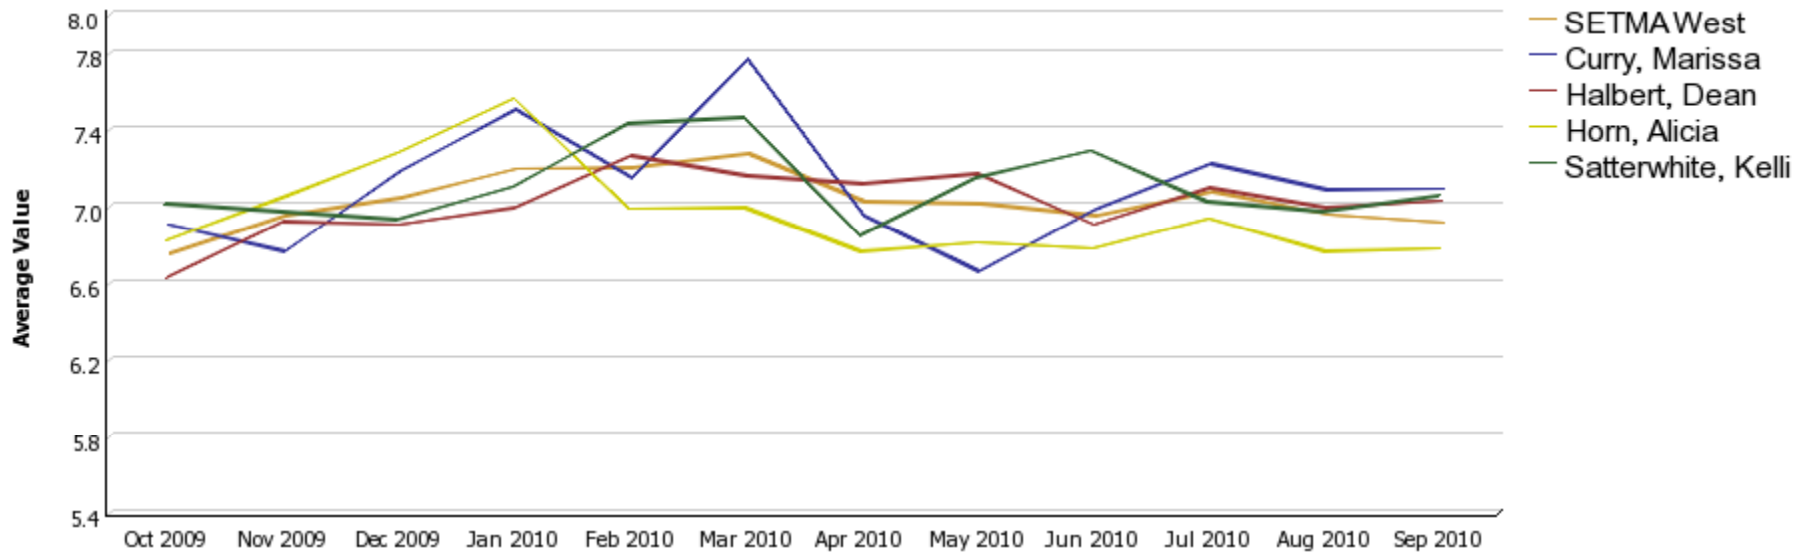

- LPA used SQL Server Integration Services (SSIS) to clean and scrub the hundreds of data points we needed for our audit rather than having to process the millions of data points contained in our EHR.
- SSIS scrubs and preloads our EHR data into the warehouse, which gives us both speed in reporting and confidence in the results in our COGNOS reports.

Auditing Performance After the Visit

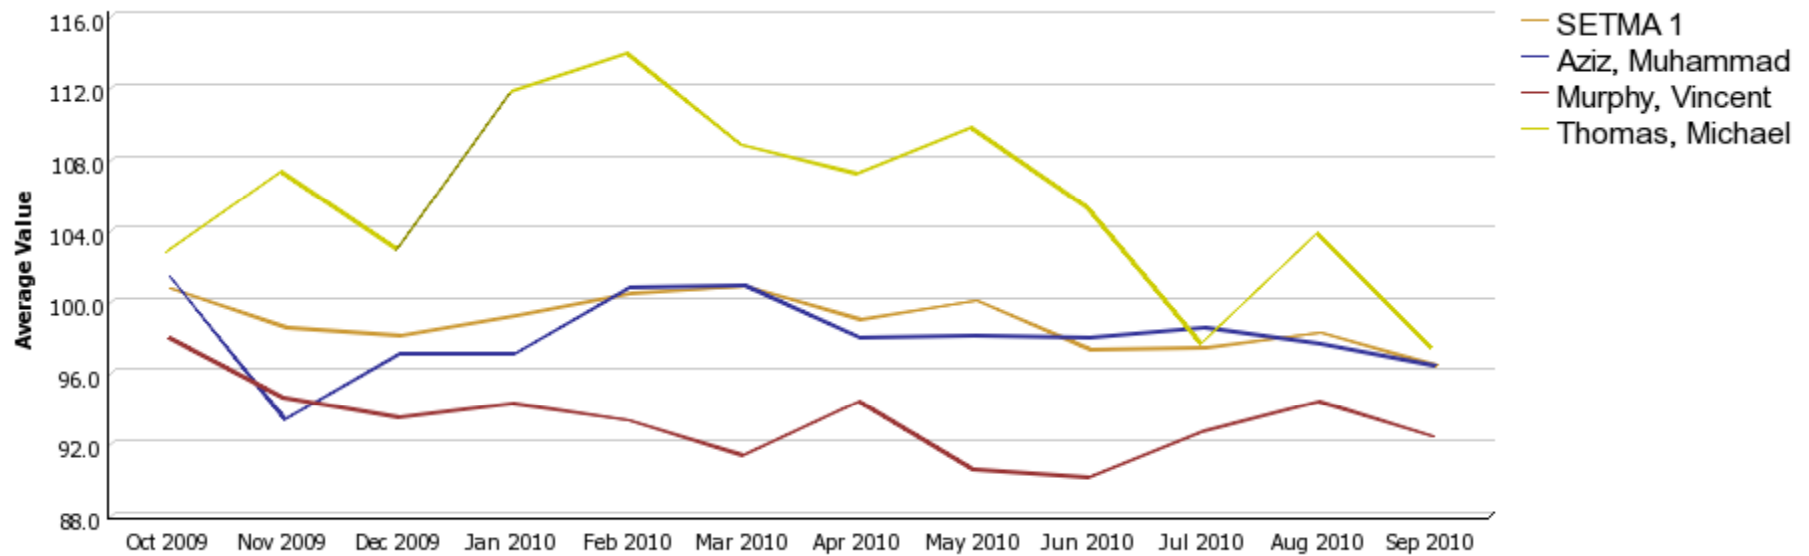

Chronic Diabetes - HgbA1c Trending

Auditing Performance After the Visit

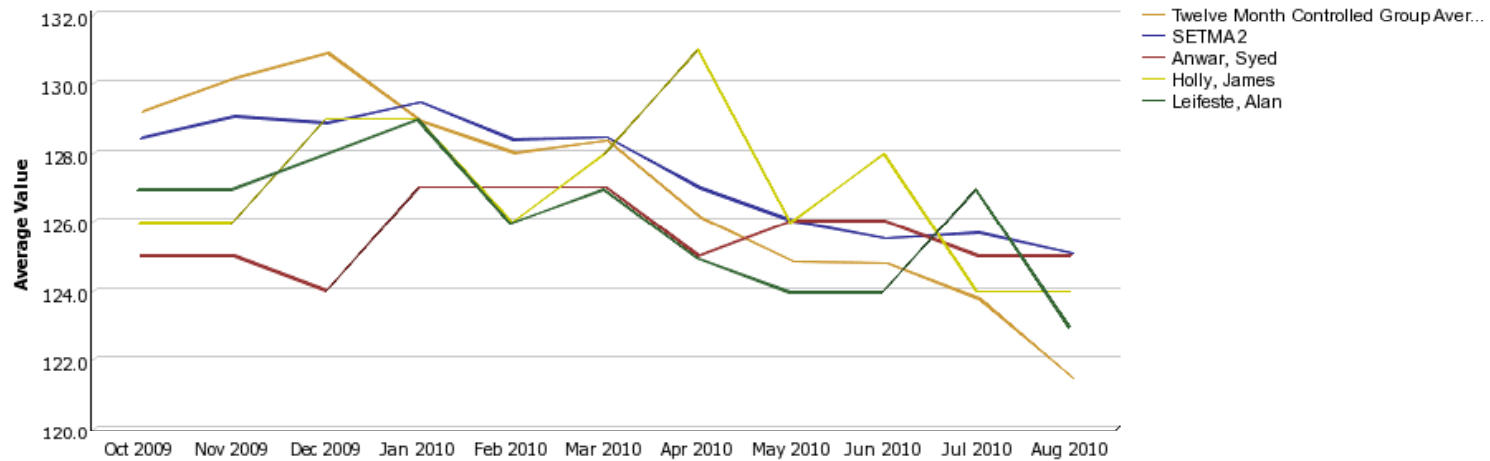

Chronic Hyperlipidemia - LDL Trending

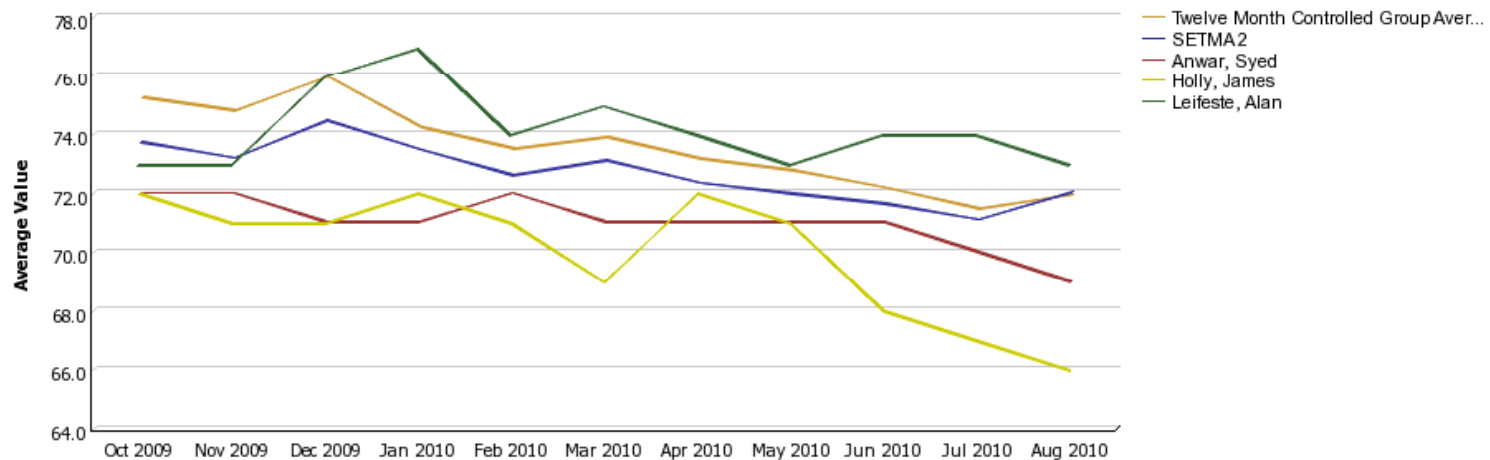

Auditing Performance After the Visit

Systolic Trending

Diastolic Trending

Auditing Performance After the Visit

Beyond how one provider performs (tracking and auditing), SETMA looks at data as a whole (analyzing) from which to develop new strategies for improving patient care.

SETMA analyzes patterns which may explain why one population is not to goal while another is. Examples of parameters analyzed:

- Frequency of visits
- Frequency of key testing
- Number of medications prescribed
- Were changes in treatments made, if patient not to goal
- Referrals to educational programs
- Etc.

Analyzing Provider Performance

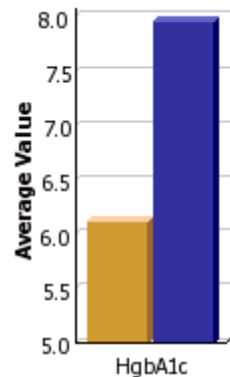

Chronic Diabetes - Measures Comparison (Most Recent 12 Months)

Chronic Hyperlipidemia - Measures Comparison (Most Recent 12 Months)

Controlled Group Time Basis: **Prior 12 Months**
 Controlled Group Constrained to: **All SETMA**
 Practice: **SETMA 1, SETMA 2, SETMA West**
 Provider: **None**

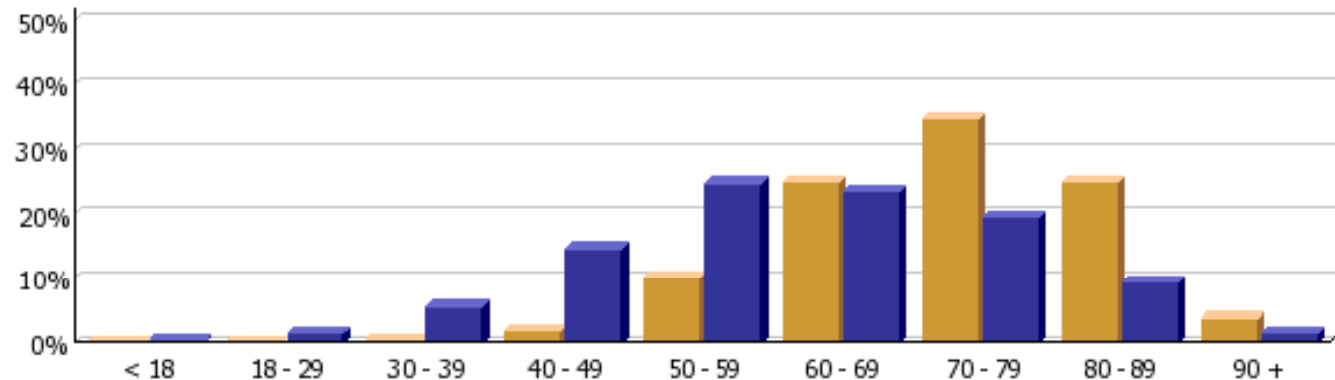

Controlled Group
 Selected Group

Gender

	Female	Male
Controlled	41.4%	58.5%
Selected	55.0%	45.0%

Age

	< 18	18 - 29	30 - 39	40 - 49	50 - 59	60 - 69	70 - 79	80 - 89	90 +
Controlled	0.0%	0.0%	0.2%	1.8%	10.0%	24.8%	34.7%	24.9%	3.7%
Selected	0.2%	1.4%	5.5%	14.5%	24.7%	23.4%	19.5%	9.3%	1.4%

Analyzing Provider Performance

Raw data can be misleading.

Example: Diabetes Care

A provider may have many patients with very high HgbA1cs;

-and the same number with equally low HgbA1cs

-- which would produce a misleadingly good average.

As a result, SETMA also measures the:

- Mean
- Median
- Mode
- Standard Deviation

Analyzing Provider Performance

SETMA's average HgbA1c has been steadily improving for the last 10 years.

Yet, standard deviation calculations revealed that a subset of SETMA patients were not being treated successfully and were being left behind

By analyzing the standard deviation of our HgbA1c we have been able to address the patients whose values fall far from the average of the rest of the clinic.

Public Reporting of Performance

One of the most insidious problems in healthcare delivery is reported in the medical literature as “treatment inertia” --

--caused by the natural inclination of human beings to resist change.

As a result, when a patient’s care is not to goal, often no change in treatment is made.

To help overcome this “treatment inertia,” SETMA publishes all of our provider auditing (both the good and the bad)

As a means to increase the level of discomfort in the healthcare provider and encourage performance improvement.

Public Reporting of Performance

Quality Assessment & Performance Improvement

Quality Assessment and Performance Improvement (QAPI)
is SETMA's roadmap for the future.

With data in hand, we can begin to use the outcomes to design quality initiatives for our future.

We can analyze our data to identify disparities in care between

- Ethnicities
- Socio-Economic Groups
- Age Groups
- Genders

Quality Assessment & Performance Improvement

- SETMA's 'Model of Care' along with Business Intelligence—
- this pairing of medicine and technology –
 - can transform the delivery of healthcare and is worthy of being adopted by others.

Quality Assessment & Performance Improvement

By expanding SETMA's *COGNOS Project*, we are also designing a quality improvement initiative for the elimination of preventable re-admissions to the hospital

["Healthcare improvement will result from transformation, not reformation. Reform comes from external pressure; transformation comes from internalized values and energy."](#)

(James L. Holly, MD, CEO, SETMA, LLP)

SouthEast Texas Medical Associates, LLP is a multi-specialty clinic located in Beaumont, Texas. SETMA has three clinical locations which are connected with a secure electronic medical record (EMR) system to store and access our patients' records. Our patients' records are also available to our providers at area hospitals so that during your in-patient care our team can make accurate decisions based on all of your historical data.

SETMA also operates a clinical laboratory, mobile x-ray services, physical therapy department, as well as a number of [Special Clinics](#). SETMA is continually developing new methods and technologies for insuring that all patients are given state-of-the-art outstanding care. SETMA's growing provider base includes [Pediatrics](#), Cardiology, Neurology, Endocrinology, [Ophthalmology](#), [Internal Medicine](#), [Nurse Practitioners](#) and [Family Practice](#). SETMA is proud of our providers' commitment to [team work](#) and [excellence](#). SETMA's Diabetes Center of Excellence continues to grow and improve the quality of care patients with diabetes receive from SETMA.

SETMA continues to expand its services to meet the growing needs of our patients and community.

The Future

The future of quality metrics and the auditing of provider performance are constantly evolving.

SETMA's *COGNOS Project* allows us to both participate in the future and to define it; and, ultimately to pay attention to the things that matter and the things that will result in improved health for all of our patients.
