Adult Body Mass Assessment - Calculation of Body Mass Index (BMI) for patients 18 to 74 years of age.

Breast Cancer Screening - Yearly mammography screening for women 40 to 69 years of age.

HEDIS - Effectiveness of Preventive Care

E & M Codes: Clinic Only

Encounter Date(s):   Jan 1, 2017 through Dec 31, 2017

Cervical Cancer Screening - Cervical cancer screening for women 21 to 64 years of age at least every two years.

Chlamydia Screening - Sexually active females between the ages of 16 and 24 should have a Chlamydia screening at least yearly.

Childhood Immunizations - Children should have the following immunizations by their second birthday: four diphtheria, tetanus and acellular pertussis (DTaP/DT), three polio (IPV), one measles, mumps and rubella (MMR), two H influenza type B (HiB) three hepatitis B, one chicken pox (VZV) and four pneumococcal conjugate vaccines.

Colorectal Cancer Screening - Patients 50 to 80 years of age should have at least one of the following: a colonoscopy within the last nine years, a flexible sigmoidoscopy within the last four years, a double contrast barium enema within the last four years or a fecal occult blood test within the last year.

Lead Screening in Children - Children should have a serum lead screening by the time of their second birthday.

Childhood Body Mass Assessment - Children 2 to 18 years of age should have the Body Mass Index (BMI) percentile documented.
